PRIMARY KEYWORD

cricket career game

You told us to target cricket career game, and we agree it is a strong search term for this app. Every keyword check in this report is scored against it. Other strong options: cricket manager, cricket simulator.

FIX THESE FIRST

4 changes, ranked by impact

Ordered by how much each check can lift your score. Each fix is written for this exact listing.

#1 · 5 pt

SEARCH & KEYWORDS

Primary keyword appears in the title

"cricket career game" doesn't appear in the title. This is the single highest-leverage edit available.

RECOMMENDED FIX

Update the title to "Cricket Legacy: Cricket Career" to include the primary keyword and improve search visibility, while keeping the brand name first and within the 30-character limit.

#2 · 4 pt

SEARCH & KEYWORDS

Primary keyword appears in the short description

"cricket career game" is missing from the short description.

RECOMMENDED FIX

Revise the short description to "Build your cricket career game legacy as a player or club manager." This integrates the primary keyword "cricket career game" to boost discoverability within the 80-character limit.

#3 · 2 pt

CONVERSION

Description length is substantial

Description is 190 chars, below the 3,000-character minimum. Google Play indexes the description, so a body this short leaves keyword and conversion surface on the table.

RECOMMENDED FIX

Expand the full description significantly, aiming for at least 3,000 characters. Detail features like player progression, club management, transfer market, and strategic decisions to capture more keywords and user interest.

#4 · 2 pt

CONVERSION

Description is scannable

The description reads as a wall of text. Chunk it into labelled sections with bullets.

RECOMMENDED FIX

Break up the full description into scannable sections using headings and bullet points. For example, use sections like "Player Career," "Club Management," and "Key Features" with bulleted lists for clarity and readability.

FULL BREAKDOWN

Every check, scored

All 12 checks the engine ran, grouped by category.

Search & Keywords

8.5 / 20 · 43%

Title uses the 30-character budget — 2.9 / 5

Title is only 14 of 30 chars. That leaves 16 characters of the strongest indexed field unused, room for a keyword descriptor.

Primary keyword appears in the title — 0 / 5

"cricket career game" doesn't appear in the title. This is the single highest-leverage edit available.

Title reads clean, not a keyword list — 2 / 2

Title reads as a brand plus a short descriptor, not a comma-separated keyword list.

Short description uses the 80-character budget — 3.6 / 4

Short description is 54 of 80 chars, 26 indexed characters unused.

Primary keyword appears in the short description — 0 / 4

"cricket career game" is missing from the short description.

Policy Compliance

9 / 9 · 100%

Title follows Play's format policy — 3 / 3

Title is free of emoji, ALL CAPS, and repeated special characters.

No banned promo language in title or short description — 4 / 4

No banned promotional or ranking language in the title or short description.

Description avoids promotional claims — 2 / 2

Description avoids ranking and price-promotion claims.

Conversion

5 / 9 · 56%

Short description sells, not welcomes — 2 / 2

Short description opens with an action verb, direct and confident.

Description length is substantial

1 / 3

Description is 190 chars, below the 3,000-character minimum. Google Play indexes the description, so a body this short leaves keyword and conversion surface on the table.

Description is scannable

1 / 3

The description reads as a wall of text. Chunk it into labelled sections with bullets.

Tone stays credible

1 / 1

Emoji and exclamation marks are restrained, the copy reads professional.

STRATEGIC ADVISORIES

Beyond the copy

Off-listing levers the score cannot measure directly, but that compound over time.

RANKING

Drive review velocity, not just count

Fresh reviews count for more than old ones. Trigger an in-app rating prompt after a positive moment (e.g. completing a task), not on launch.

CONVERSION

Track conversion rate from search

In your Google Play Console dashboard, click the Grow users tab in the left sidebar, then open Store presence and click your default store listing to see your store listing conversion rate (visitor to install). Aim for 25% or higher. If you are below that, the icon, screenshots, or title are losing visitors.

CONVERSION

A/B test screenshots and copy with store-native tools

Play Console's store listing experiments run real-traffic A/B tests at no cost. Test the first three screenshots and the short description first.

EXPANSION

Localize the listing for your top 3 markets

Each locale is a separate listing on Play. An English-only listing under-ranks against localized competitors.

MAINTENANCE

Ship a small update every 6 to 8 weeks

Both stores favour actively maintained apps, and users check the last-updated date. A version bump with a refreshed What's New note is enough.

OPTIMIZED DESCRIPTION

We also optimize your description for you

This report is your ASO score. Log in to the Testers Community website, open your app, and go to the Reports tab to generate an optimized store description, ready to paste into Play Console.
